21700 How much is the new battery cell

Overview

This cell is brand new in the case, in original factory packaging. These are sold by the case of 130 count, and the individual cell price at this quantity is an incredibly low \$6.14 each. What is a high capacity 21700 battery?

These advancements in 21700 capacity reflect the rapid development of lithium ion battery cell technology. These new high capacity 21700 cells make lithium ion batteries even better for demanding applications like portable power tools, EVs, and high-drain devices. Where To Buy The Highest Capacity 21700?

Is 21700 a good battery cell?

In comparison with other types of lithium ion battery cells, 21700 is of course not the best Performance ever battery cell, but it is the best choice for energy density and energy cost. The physical dimensions of the cylindrical cores increase not only the energy density but also the productivity coefficient of cyclic life.

Where can I buy 21700 batteries?

At IMR Batteries, we stock authentic, high-quality 21700 cells from leading brands, ensuring reliable performance, safety, and longevity. Shop now to find the best power solution for your needs. Find 21700 batteries at IMR Batteries.

How much does a 21700 battery weigh?

Tip: When selecting a 21700 battery, consider the specific chemistry to match your application's energy and cycle life requirements. The 21700 cell weighs approximately 60–70 grams, depending on the manufacturer and specific chemistry.
