30kw hybrid inverter in China in Atlanta

Overview

What is a 30kW inverter?

This is a 30kW Inverter, an efficient and highly reliable energy storage solution developed for small and medium-sized microgrids, supporting 30 kW PCS solar integration with competitive 30 kW PCS price.

What is a hybrid V3 30kW inverter?

This Hybrid V3 30KW is the single largest 3-phase inverter we offer at the moment with 230V (P-N) / 400V (P-P) output and it is designed mainly for industrial application with a DC nominal base voltage of 384V.

Can a hybrid V3 30kW be used as a generator?

Similar to all of our hybrid-line inverters (grid feed capable), the Hybrid V3 30KW can also send any excess solar power to grid. In OFF-GRID mode, generators may be used in place of utility for backup. An integrated dry contact may be used to control on/off of the generator. Only quality inverter-type generators are recommended for use.
