# **40-foot folding shipping container for island use**

## Overview

---

What is a 40 ft container used for?

40ft units can be used for commercial, residential, and shipping industry applications. There are a few types of 40-foot shipping containers, but the most common one is the standard dry 40' shipping container. These storage containers are easy to load and unload and can hold products that are dense or have a lot of weight.

What is a 40-foot shipping container?

A 40-foot shipping container is a large, standard-sized container used for transporting goods. It measures 40 feet in length and is typically used for international shipping.

How much cargo can a 40ft container hold?

Compared to a 20ft shipping container, a 40ft container can pack a whopping 2.53 m of cargo for every ton of weight. Meaning, a 40' container can hold up to approximately 26.76 tons of cargo. 40ft units can be used for commercial, residential, and shipping industry applications.

What is a seafold 40 ft container?

The container's design facilitates ease of stacking and handling, significantly reducing the costs associated with freight and storage. In addition, the innovative design allows for quicker turnover times at ports, enhancing the efficiency of global trade routes. The SeaFold 40' container is equipped with a state-of-the-art collapsing mechanism.
