400W monocrystalline solar charging panel

Overview

How much power does a monocrystalline solar panel use?

Each port is rated at 5V and pumps out up to 3 amps of power per USB port (15W total maximum output) to provide wall-outlet charging speeds. Monocrystalline panels with ETFE construction provide maximum efficiency and a UV-ray permeability of 95% compared to 80% from PET - makes the panel more efficient than most solar chargers.
