Why did Abkhazia lose electricity?

(Maksim Konstantinov/SOPA Images/LightRocket via Getty Images) This audio is created with AI assistance Georgia's Russian-occupied region of Abkhazia lost all electricity supply due to the shutdown of the only power station supplying energy to the region, Russian state news agency TASS reported on Dec. 11, citing an Abkhaz energy company.

Why is Abkhazia facing energy shortages?

The region has recently faced energy shortages aggravated by a growing spat with its Russian patrons. Moscow has cut almost all funding, including money crucial for the energy sector, after Abkhazia's local council voted against a controversial investment agreement with Russia.

How do inverters provide grid services?

In order to provide grid services, inverters need to have sources of power that they can control. This could be either generation, such as a solar panel that is currently producing electricity, or storage, like a battery system that can be used to provide power that was previously stored.

Why did Russia occupy Abkhazia & South Ossetia?

The full-blown energy crisis came even though the Abkhaz authorities appealed to Russia for assistance on Dec. 6. Russia has occupied Abkhazia and South Ossetia after a war with Tbilisi in 2008, backing local breakaway leadership. Both regions are internationally recognized as Georgia 's sovereign soil.
