# About the energy storage cooperation plan

## Overview

---

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

How can China improve international cooperation in the energy storage sector?

To beef up international cooperation in the new-type energy storage sector, China will work to incorporate collaboration in the field into international cooperation mechanisms and frameworks such as the Belt and Road Initiative and BRICS and promote mutually beneficial cooperation on industrial and supply chains.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

What is the new-type energy storage manufacturing industry?

According to an action plan jointly issued by the Ministry of Industry and Information Technology and seven other government organs, the new-type energy storage manufacturing industry refers to the sector that produces energy storage, information processing, safety control, and other products related to new energy storage methods.

## About the energy storage cooperation plan

To beef up international cooperation in the new-type energy storage sector, China will work to incorporate collaboration in the field into international cooperation mechanisms and frameworks such as the Belt and Road Initiative and BRICS and promote mutually beneficial cooperation on industrial and supply chains.

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

According to an action plan jointly issued by the Ministry of Industry and Information Technology and seven other government organs, the new-type energy storage manufacturing industry refers to the sector that produces energy storage, information processing, safety control, and other products related to new energy storage methods.

The China Energy Storage Alliance (CNESA) and the Natural Resources Defense Council (NRDC) recently signed a Memorandum of Understanding (MOU) in Beijing to ...

The plan outlined 21 key measures, including scaling up energy storage applications in power generation and grid infrastructure, accelerating technological innovation, ...

NINGBO, China, Dec. 10, 2025 /CNW/ -- Recently, Risen Energy announced the signing of

a 3 GWh energy storage system cooperation MOU with WEG, a leading Brazilian ...

The China Energy Storage Alliance (CNESA) and the Natural Resources Defense Council (NRDC) recently signed a Memorandum of ...

15 hours ago In 2022, they jointly initiated the establishment of the "China New Energy Storage Industry Innovation Alliance." From 2023 to 2025, their cooperation continued to deepen, with ...

03 Shanghai Electric Signs 5GWh Energy Storage Project On December 4, Shanghai Electric Energy Storage Technology Co., Ltd. and the People's Government of ...

To integrate variable renewable energy resources into grids, energy storage is key. Energy storage allows for the increased use of wind and solar ...

Foreword Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and ...

Ever tried solving a jigsaw puzzle in the dark? That's what building sustainable energy systems feels like without proper storage solutions. Enter energy storage cooperation ...

A 500 MW/2,000 MWh standalone battery energy storage system (BESS) in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction ...

According to an action plan jointly issued by the Ministry of Industry and Information Technology and seven other government organs, the new-type energy storage ...

To integrate variable renewable energy resources into grids, energy storage is key. Energy storage allows for the increased use of wind and solar power, which can not only increase ...
