Africa voltage stabilizer inverter manufacturers

Overview

Does South Africa have a voltage stabilizer?

Regulates the inconsistent input power voltage and output constant voltage. Fluctuations vary from country to country. Due to numerous recent outages, South Africa suffers greatly from unstable voltage. It is recommended that you equip Voltage Stabilizers to all appliances. Alternatively install a large AVR for your whole house or office.

Which inverter systems are available in South Africa?

PHD has the widest range of Inverter systems in south africa, and the southern african region, we have both pure and modified sinewave inverter systems, with and with out battery chargers. We offer Victron Range aswell as the state of the are super home (ST2X) range and the Studer range of inverters directly from Studer Switzerland.

What is a voltage stabilizer?

A Voltage Stabilizer has been created to maintain a constant voltage level automatically, offering protection to equipment against voltage surges, under-voltage, over-voltage, whilst smoothing impulsive noise. A Voltage Stabiliser is also referred to as an Automatic Voltage Stabiliser, AC Voltage Stabiliser or Voltage Regulator.

Should I install a voltage stabilizer?

Alternatively install a large AVR for your whole house or office. The Voltage Stabilizer is good for protecting homes plus it plays an important role in commercial, retail and industrial situations.
