Andor multifunctional energy storage power supply procurement

Overview

Can energy storage resources provide dispatchable energy?

From the perspective of the industry, the relief could not come soon enough. With the increasing penetration of renewable energy resources, the demand for energy storage resources that can provide capacity—the ability to provide dispatchable energy—has become paramount.

Can energy storage resources be financed on a non-recourse basis?

Key Finance-ability Provisions: Energy storage resources may also be financed on a non-recourse basis and, as with any other project financed in such manner, will need to address issues upon which non-recourse lenders will focus, including assignment, events of default, performance requirements, key dates and collateral.

Can a supplier achieve substantial completion?

It will be a negotiated point as to whether the supplier may be able to achieve substantial completion by achieving a lesser level of performance and paying liquidated damages, or whether there will be a strict guarantee.
