## Overview

---

What is a solar investment tax credit?

For instance, the federal solar investment tax credit (ITC) reduces your federal income tax liability by 30% of what you spent for a solar energy system, including the cost of installation. The federal solar tax credit expires at the end of 2025. For example, if you spent \$10,000 installing a solar panel system, then the ITC would be worth \$3,000.

What are the most important solar incentives in 2025?

Here's your up-to-date guide to the most important incentives in 2025 — and how to take advantage of them. The Investment Tax Credit (ITC) is the biggest incentive in the U.S. for residential solar. It allows you to deduct 30% of the cost of a solar energy system from your federal taxes.

How do tax credits & rebates make solar more affordable?

Tax credits and rebates make solar more affordable in different ways. A tax credit is claimed when you file your tax returns, while a rebate is a partial refund you get after buying solar panels. These are dollar-for-dollar reductions in the income tax you owe.

When does the solar tax credit end?

With the federal solar tax credit ending much sooner than expected — you now only have until Dec. 31, 2025, to install a system and get the 30% solar tax credit — it's definitely in your best interest to take advantage of all the solar incentives available to you.
