

# **Austria household energy storage power supply price**

## Overview

---

What is energy supply in Austria?

**Energy Supply (Wholesale & Retail):** This is the cost of generating or procuring the electricity. In Austria's liberalized market, suppliers buy electricity on the wholesale market or produce it, and add a retail margin. This energy component typically makes up about 40-50% of the end-user price.

What are electricity prices in Austria?

Electricity prices for end consumers in Austria consist of several components: energy supply costs, regulated grid fees, and government taxes and surcharges. Typical breakdown of household electricity price in Austria (3500 kWh/year, as of Jan. 2025). Energy (~44%) + Network (~28%) + Taxes/Surcharges (~28%).

What is Austria's electricity supply in 2025?

Austria's electricity supply in 2025 remains dominated by renewable energy, continuing a long-standing trend. Table 1 summarizes the generation mix based on the latest data (2024), with historical context: Table 1: Austria's Electricity Generation Mix (2024 data with context).

Does Austria have an electricity market?

Austria's electricity market is not an isolated entity but is intricately linked with the broader European Union (EU) electricity market. This integration plays a crucial role in the stability and efficiency of Austria's energy sector.
