## Overview

---

How much does a solar system cost in New York?

Solar power system cost based on your location, roof, power usage, and current local offers. Last updated: December 2024. As of 2024, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

Do you pay sales tax on solar panels in New York?

You don't need to pay any sales tax on new solar panel systems in New York, saving at least 4% of your system costs. If you use solar energy as a source of power, for 15 years you won't need to pay a tax on the value your solar panels add to your property.

Does solar cost a lot?

The overall cost of solar can be influenced by the solar incentives available. Across the U.S., homeowners can apply for the federal solar tax credit. The solar tax credit makes installing solar more cost-effective by providing homeowners with a tax credit equal to 30% of the cost of their installed solar panel system.
