

Battery cabinet alarm setting

Resistant to -20°C~55°C high and low temperature.

Overview

How do I connect a battery cabinet to a power system?

Procedure 1. Furnished with the battery cabinet are battery disconnect circuit breaker alarm lead assemblies. Refer to the power system installation manual to use these alarm leads to connect the battery cabinet battery disconnect circuit breaker alarm into the power system alarm circuits.

Where is the battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. The recommended location is to the right of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 21.

How do I connect a ups to a building alarm?

Line-Up-and-Match Wiring. Route the battery detect interface wiring from the UPS battery detect (building alarm) interface terminals through the top inter-cabinet access pass-through (see Figure 15) of the UPS cabinet and IBC to the IBC battery interface terminal block TB3. See Figure 27 or Figure 28 for terminal locations.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 3 for line-up-and-match configuration views. Figure 3. Eaton 93PM 100 kW UPS and Two 93PM Integrated Battery Cabinets
