## Overview

---

When will the first shore power connection be installed in Belgium?

Antwerp Euroterminal (AET) has decided to install the first shore power connection for seagoing vessels in Belgium. Expected to be operational in 2026, the shore power installation is said to be the first in Belgium for seagoing vessels, built according to international ISO standards.

Will Antwerp Euroterminal install a shore power connection in Belgium?

Antwerp Euroterminal (AET) in Belgium has unveiled plans to install shore power connection facilities for use by ships. The installation will be operational in 2026. Once completed, it will be the first vessel shore power connection to be established in Belgium.

How will Belgium's New shore power system impact the environment?

This innovative installation, operational by 2026, will provide docked ships with environmentally friendly and quiet electricity, significantly contributing to the port's sustainability efforts. Built to international ISO standards, this will be Belgium's premier shore power setup for seagoing vessels.

Where can a Bargemaster use shore power in Antwerp?

Port of Antwerp-Bruges and the City of Antwerp offer skippers a large number of connection points to shore power in Antwerp. This network allows bargemasters to use electricity via the shore while the vessels are berthed at the waiting dock. We currently have three shore power sites under our management.
