# **Berlin folding container single phase used in train station**

## Overview

---

What is the largest crossing station in Europe?

As the largest crossing station in Europe, the new central station creates a nodal point, which connects all four cardinal directions. Running in east-west direction the approximately 320 m long hall over the “Stadtbahn” (light railway) covers all 6 tracks with a maximum span of roughly 66 m.

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

How many containers can a collapsecon hold?

COLLAPSECON's innovative and fully automated design allows up to 4 containers to be collapsed and combined, giving them a fully laden weight and enabling them to be transported anywhere on a ship. 1/6 COLLAPSECON collapses horizontally, ensuring the container maintains its structural rigidity in any form.

How long is the hall over the Stadtbahn?

Running in east-west direction the approximately 320 m long hall over the “Stadtbahn” (light railway) covers all 6 tracks with a maximum span of roughly 66 m. Cable trusses with cables following the form of the bending moment diagram due to permanent loads stiffen the filigree grid shell structure, transforming the basket arch into the thrust line.
