Bucharest solar energy storage policy update

Overview

Why is battery storage important in Romania?

This policy shift aligns Romania more closely with EU energy goals, where battery storage is increasingly recognized as an enabler of grid flexibility, renewable integration, and energy security.

Why is Romania removing double taxation on energy storage?

Romania's elimination of double taxation on energy storage is more than a technical adjustment—it's a strategic inflection point. By aligning its regulatory framework with market realities, the country is removing one of the last structural barriers to widespread BESS adoption.

Why has Romania overhauled a key regulatory barrier preventing energy storage?

In a decisive move to support its clean energy transition, Romania has overhauled a key regulatory barrier holding back investment in energy storage.

Why should investors invest in energy storage in Romania?

This step improves regulatory transparency, another key factor investors consider when committing capital. Romania's ambitions for energy storage are growing rapidly. The country plans to install 5 GW of battery energy storage capacity by 2026, a massive leap from its current level, which reached around 400 MWh as of April 2025.

Discover Romania's updated legal framework for renewable energy storage. Learn how new regulations, incentives, and grid rules shape investment opportunities in battery and ...

Energy Policy Group (2020), Romania's Energy Storage: Assessment of Potential and Regulatory Framework, December 2020. The European Green Deal, with its flagship policy, the Climate ...

Romania eliminates double taxation on battery energy storage systems to attract investors and accelerate renewable integration across ...

Romania's parliament has adopted a bill mandating prosumers with PV systems with capacities from 10.8 kW to 400 kW to install energy ...

A solar project from developer Econergy in Romania. The country's solar sector is set to grow substantially, which will help the battery storage market kick on. Image: Econergy. ...

The new regulation requires grid operators to mandatorily report energy storage data, and it applies uniformly to both concession and non-concession entities. This new ...

Romania eliminates double taxation on battery energy storage systems to attract investors and accelerate renewable integration across the national grid.

The National Energy Regulatory Authority (ANRE) regulates Romania's energy sector. Here is a local meeting it held a few months ...

On July 8th, Romania's Energy Regulatory Authority (ANRE) officially approved new regulations abolishing double taxation on battery energy storage systems (BESS). The ...

The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to ...

What emerges is a sector that is more selective, more structured, and significantly better aligned with Romania's long-term energy-transition objectives. Policy direction: ambition ...

Romania's parliament has adopted a bill mandating prosumers with PV systems with capacities from 10.8 kW to 400 kW to install energy storage systems.

The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to allow for faster deployment of solutions for ...

The National Energy Regulatory Authority (ANRE) regulates Romania's energy sector. Here is a local meeting it held a few months ago, with president George Niculescu sat ...
