

## **NKOSITHANDILEB SOLAR**

**Can the space under the solar panels and solar panels be used as a warehouse**

## Overview

---

Can a warehouse install solar panels in other areas?

A warehouse can install solar panels in other areas if its roof space is limited. A warehouse roof facing south is the best place for solar installation, but some factories need more roof space to generate the required amount of electricity. With such limitations, warehouse owners can be creative and find other areas to install their solar arrays.

Do warehouses & distribution centres need solar?

Warehouses and distribution centres can massively benefit from solar installation. This is due to the large, flat roof space available. Find out more.

Can a warehouse roof be used for solar panels?

With SolarSkin custom-printed overlays, warehouses can turn their sea of rooftop solar panels into a beautiful branding opportunity. Warehouse roofs are excellent spaces for solar installations since they're flat, have large surface areas, and are exposed to direct sunlight.

How much energy does a warehouse save from solar?

On average, energy bills for warehouses account for about 15% of their total operating costs. However, the exact amount of money warehouse saves from solar panel installation varies by hundreds or thousands of dollars depending on: What If A Warehouse Doesn't Have Enough Roof Space For Solar?
