# **Cape Town with solar air conditioning**

## Overview

---

Why should you choose solar-powered air conditioning in Cape Town?

Solar-powered air conditioning reduces your carbon footprint. For eco-conscious Cape Town households and businesses, this is a strong motivator. A home or office equipped with solar and energy-efficient climate control is more attractive to buyers and tenants. Cape Town Airconditioning 4. Practical Challenges to Consider.

Why do aircon & solar make a difference in Cape Town?

Here's why the combination of aircon + solar makes so much sense locally: Cape Town gets an average of 3,100 hours of sunshine per year — one of the highest globally. This makes solar highly effective, especially for running aircons during summer's peak heat.

Is Cape Town a good place to run a solar system?

Cape Town gets an average of 3,100 hours of sunshine per year — one of the highest globally. This makes solar highly effective, especially for running aircons during summer's peak heat. Eskom's annual tariff hikes are making it more expensive to run energy-intensive appliances.

Which air conditioners are popular in South Africa?

Off-grid and hybrid air conditioners gain increasing popularity across South Africa as market demand grows. Samsung Air Conditioning along with Deye Aircon Acdc represent the leading brands in this industry sector. The modern units enable users to utilize solar power without any expense for their cooling requirements.
