

**NKOSITHANDILEB SOLAR**

# **China-Europe 5G solar container communication station wind power bidding**

## Overview

---

What did the EU and China do about 5G industrial openness?

They undertook to secure an equivalent level of industrial openness in the EU and in China for the 5G industrial associations that are steering the implementation of R&D, and notably the 5G Infrastructure Association and the IMT-2020 (5G) Promotion Group.

How big is China's solar power pipeline?

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China's already operating 1.4 TW of solar and wind capacity, nearly 26% of which (357 gigawatts (GW)) came online in 2024.

How much wind power does China have in 2024?

This is in addition to China's already operating 1.4 TW of solar and wind capacity, nearly 26% of which (357 gigawatts (GW)) came online in 2024. Though only a small portion of China's overall renewable capacity, China's offshore wind fleet contributes over 50% of the overall offshore wind capacity in construction worldwide.

What's going on between China and the EU?

The move is the latest in a brewing trade war between the two economic giants. The investigation will focus on wind power, photovoltaics, security equipment and electric trains, the Chinese Commerce Ministry said. The EU has used a new regulation to investigate companies bidding for projects within the European Union.
