# **China koten circuit breaker factory manufacturer**

## Overview

---

What is k-63n breaker?

K-63N is an inverse time delay type of breaker that is mounted to a din rail. It has 240V rated insulated voltage, 6A up to 63A rated current, and an interrupting capacity of 6KAIC with a common trip operation. This product undergoes quality control testing and certification in compliance with the Philippine National Standard (PNS 1573-2:1997).

What are the different types of circuit breakers?

In terms of voltage level, it can be divided into HV circuit breakers, MV circuit breakers and LV circuit breakers. Based on its arc extinguishing materials, it has oil-immersed type, vacuum type and filling-in SF6 air. Divided by structure: There are universal (frame type), plastic shell type, and small micro break;

How many units can a circuit breaker produce?

Equipped with world's most advanced automatic production line. Annual production capacity over 50,000 units. Our circuit breakers are equipped with the world's most advanced automatic production line, featuring an annual capacity of 60,000 units.
