Community Solar Container Exchange

Overview

Consumers can contact their local electric utility or use an internet search engine to find community solar subscriptions that may be available to them in their areas. The signup process for community solar d.

What is community solar?

The U.S. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits flow to multiple customers such as individuals, businesses, nonprofits, and other groups. In most cases, customers benefit from energy generated by solar panels at an off-site array.

How does community solar work?

The local utility pays the community solar provider for the energy generated, and each subscriber receives a portion of the dollar value generated by their community solar subscription as a credit. Typically, this credit is applied directly to a subscriber's monthly electric bill, helping to reduce customers' electricity costs. Why Community Solar?

.

Who manages a community solar project?

The host is the owner of the location where the community solar project will be located. The sponsor manages the subscriptions to the solar project and the relationship with the utility. The project sponsor and project host can be the same.

What is a community solar project host?

Community Solar Project Host: the owner of the site where the community solar project will be located
Community Solar Project Sponsor: manages the project subscribers and their relationship with the utility. The sponsor and the host can be the same
