Compact power station factory in Vancouver

Overview

Does Invinity Energy Systems have a warehouse in Vancouver?

At first glance, the East Vancouver facility of Invinity Energy Systems seems a little empty. High ceilings, nondescript white walls and sturdy grey floors with enough space to comfortably house 15 cars come together to paint the picture of a warehouse yet to be filled.

Where is Canada's largest lithium-ion battery plant located?

Image courtesy of Stantec Consulting Services Inc. will design an estimated \$800-million lithium-ion battery cell plant near Vancouver, British Columbia, which would be Canada's largest for producing high-performance batteries used in vehicles and for other consumer and manufacturing applications.

How many vanadium flow batteries can Invinity produce a year?

Above: Guests attending the open day Expanded in a short space of time in response to the fast-growing demand for Invinity's alternative to lithium-ion batteries for energy storage projects, the Company's Vancouver facility is now able to produce up to 200 MWh of vanadium flow batteries per year.

What's going on with a new lithium-ion battery plant in British Columbia?

With a production capacity of 2.8 GWh, the new plant is intended to anchor the company's North American production of lithium-ion batteries and create a British Columbia hub in the global battery component supply chain. "We are building clean energy here, that's our vision," So told ENR.
