

# Companies investing in energy storage power stations in Colombia

- ✓ High energy density and long cycle life
- ✓ Modular structure

No need to replace the battery

Shorter charging time

Meets 99% EV car

## Overview

---

Where is geothermal energy available in Colombia?

Geothermal: The Colombian Geological Service estimated an electric power of 1,170 MW, and there is special interest in areas such as Paipa (Boyacá), Azufral (Nariño), San Diego (Cesar), Nevado del Ruiz (Tolima-Caldas), Santa Rosa (Risaralda), and Cerro Machín (Tolima). 50% income tax deduction for 15 years for investments in alternative sources.

How many renewable projects are there in Colombia?

Colombia There are more than 251 renewable projects with a total installed capacity of 15,684.52 MW registered with UPME in pre-feasibility, feasibility, and detailed engineering stages. Developers of these projects are open to strategic partnerships with investors willing to take the projects to construction and operation.

Why is Colombia a global leader in sustainability?

Due to the high dependence on water sources for energy generation and in line with policies aimed at positioning the country as a global leader in sustainability, Colombia has implemented a modern regulatory, institutional, and market scheme that aims to diversify the energy matrix.

How will Colombia diversify its energy matrix in 2050?

Colombia has implemented a modern regulatory, institutional, and market scheme to diversify the energy matrix. According to the 2050 Energy Plan published by UPME, it is expected that 25% of the energy matrix will come from unconventional renewable energy sources to meet climate goals and achieve carbon neutrality by 2050. Aes Corporation, Meta.
