Comparison of a 500kW folding container and a diesel generator

Overview

What is a containerized diesel generator?

Discover the containerized diesel generators at DINGBO Power, offering a mobile and secure power solution for a wide range of applications. These generators are housed in robust containers, providing enhanced security and portability. Ideal for use in remote, outdoor, or temporary sites, they ensure reliable power delivery in any setting.

Can a diesel generator be used as a standby generator?

Excess usage: Most diesel generators are designed to provide backup power. Should a standby generator be used for prime power, care should be taken to ensure the generator is inspected frequently and only used for as long as it is required.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.
