# **Cost of 20kW Solar Containerized Container Used at Australian Airports**

## Overview

---

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. How much does a 20 kW solar system cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh. You should combine these two buckets to estimate your total project price: 20 kW PV only: ~\$19,000–\$24,000.

How much does a 20kW Solar System cost?

You can expect to pay around \$19,771 for a 20kW system installed. Prices can vary wildly depending on the quality of panels you install and the company that quotes the job. The above price is after you have received your government rebate (\$6,584 for 20kW systems) and does not include the price for battery backup.

Is a 20kW Solar System a good investment?

With a daily power output north of 70kWh each day depending on your location and the position of your property, a 20kW solar system has the potential to generate enough power to pay for the upfront cost and become an ROI positive investment for most businesses in a few short years. How much does a 20kW solar system cost in Australia?

.

What is a 20kW Solar System?

A 20kW solar system is a large and future-proof solar system capable of meeting the electricity needs of larger residential properties or small to medium-sized commercial businesses. A 20kW solar system is ideal for properties with significant energy demands and plenty of roof space.
