Cuba s earthquake high altitude solar container communication station wind power

Overview

Will Cuba get more solar energy by 2030?

By 2030, the country aims to generate more than a third of its electricity from solar parks and other renewable sources. Cuba on Friday unveiled a new solar energy park in the capital Havana, part of an ambitious project to alleviate the communist island's increasingly desperate struggle with power blackouts.

What happened to Cuba's power grid?

It's been a rough year for Cuba. The island nation has suffered through a series of powerful storms, including two recent hurricanes that knocked out its power grid. And now, Cuba was hit with a 6.8 magnitude earthquake just off its southern coast Sunday, near the town of Bartolomé Masó in Granma Province.

Did Cuba get a quake?

And now, Cuba was hit with a 6.8 magnitude earthquake just off its southern coast Sunday, near the town of Bartolomé Masó in Granma Province. Preceded by a 5.9-magnitude tremor about an hour before the full quake hit, the earthquake caused damage throughout the eastern regions of the nation, including Santiago de Cuba, Guantánamo, and Holguín.

Where is the most seismic activity in Cuba?

Most seismic activity in Cuba takes place in the region around Santiago. A fault line runs along the island's southeastern coast, marking the boundary between the North American plate and the Caribbean plate, according to Cuba's seismic service. Content continues below
