

NKOSITHANDILEB SOLAR

Customized Solar Lighting System

Overview

What is Custom Solar?

Custom Solar is a company with design and installation expertise that, when combined with Mitie's industry leading project management and mobile engineering offering, will support Mitie's ambition to be a leading provider of end-to-end green energy solutions.

What is a solar lighting system?

A solar lighting system refers to an eco-friendly lighting solution that harnesses power from sunlight through photovoltaic (PV) panels. It captures and converts sunlight into electricity, which is then stored in batteries for use when needed, such as during the night or on cloudy days.

Where can solar lights be used?

Here are some examples of where solar lighting systems can be used: 1. Solar Floodlights: Utilizable during power cuts or in emergency situations, these potent solar lights can also be employed in home workshops, garages, yards, and businesses needing robust illumination or extra security. 2.

How do I choose the best solar lights?

Purpose of the Lighting: Determine the primary use of your solar lights—whether for security purposes, which would require bright floodlights, or for decorative purposes, allowing for softer ambient lights. The intended application dictates the strength and design of the lighting fixtures.
