

Democratic Republic of Congo

50W solar street light

Overview

Where is a solar farm in Congo?

A solar farm operates on , in Bulengo, a neighborhood near Goma, Congo. (AP Photo/Moses Sawasawa) GOMA, Congo (AP) — Street lights erase the shadows where attackers once hid. Noisy, polluting diesel generators have gone silent. New businesses are taking root.

Is off-grid solar power a 'cornerstone of Africa's Energy Future?

About 565 million people in Sub-Saharan Africa lack electricity — representing about 85% of the global population without power. This makes off-grid solar power a “cornerstone of Africa's energy future,” especially in rural areas, said Stephen Kansuk, the United Nations Development Programme's regional technical advisor for Africa.

Will Nuru be able to serve 10 million Congolese by 2030?

Nuru is building another 3.7-megawatt plant in Goma, which is about 70% complete but currently on hold due to the security situation. The company aims to serve 10 million Congolese by the end of 2030. “We just feel like this could scale really rapidly and have an incredible impact in Congo and beyond,” said Shaw.

Where do Rwandans get electricity?

Provincial officials then asked them to consider Goma, near the Rwandan border, where only a small fraction of the population had access to electricity — usually from diesel-powered generators, Shaw said.
