Democratic Republic of Congo introduces new energy storage company

Overview

Located in a mining area in southeastern DRC, CEECATL developed a high-safety, long-life, and intelligent grid-forming energy storage system tailored to the project's power demand and load characteristics through in-depth technical research and feasibility studies. Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

How will Nuru empower 5 million Congolese people?

By delivering world-class renewable energy and connectivity services, Nuru aims to empower 5 million Congolese people, one connection at a time. Moving ahead, it will be important to strengthen the public sector and the government's capacity for cross-unit delivery in order to effectively finance renewable energy mini and metro-grids.

How does Nuru support DRC's SNDP?

NURU and its investors endeavor to aid in closing the energy access deficit, while directly diversifying and decentralizing DRC's energy mix, thereby supporting DRC's Strategic National Development Plan (SNDP 2019-2023) goal for increased renewable energy capacity.

Will PROPARCO invest in a mini-grid project in eastern DRC?

Building on these initial successes, the company has developed a pipeline of mini-grid projects in Eastern DRC. Proparco plans to co-invest with IFC in this opportunity, and has jointly led the ESG and Governance action plans, bringing much-needed risk capital to the round to fully finance the series B projects.
