Dominica Communications Green Base Station in Residential

Overview

Does Dominica have a freshwater system?

Dominica's freshwater utility is in the process of being upgraded as well. The new system will protect against potential impacts from a natural disaster. The island is literally brimming with fresh water. Dominica has also invested in upgrades to the port to ensure convenient and fast processing times.

Does Dominica have a new airport?

Dominica has also invested in upgrades to the port to ensure convenient and fast processing times. In addition to the existing regional airports, planning is underway for a new airport in Dominica that will be able to handle large aircraft and direct flights from major markets around the world.

Will Dominica be the world's first climate resilient nation by 2030?

On a mission to be the world's first climate resilient nation by 2030, Dominica has invested heavily in infrastructure, completing projects like putting fiber underground to ensure continued internet connectivity. Dominica's freshwater utility is in the process of being upgraded as well.

Is Dominica a good investment destination?

The investments being made by Dominica have positioned the nation as the ideal investment destination for investors looking to capitalize on future growth by investing today. There are two main sea ports that accommodate cargo and pleasure traffic. Work to expand the existing seaports to increase their capacity is in progress.
