# **Dominican Electric Energy Storage Project**

## Overview

---

What is the first solar-plus-storage project in the Dominican Republic?

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

How does the Dominican Electricity Company work?

The Dominican Transmission Electricity Company operates interconnected transmission and runs high-voltage electric transmission projects, while state-owned distribution companies serve three regions of the country.

What is the Dominicana Azul solar project?

The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December). Construction has started on the first major solar-plus-storage project in the Dominican Republic, featuring a 99MWh battery system.
