EU container reefer generator

Overview

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear bearing.

What is a reefer generator?

Underslung Type Reefer Generator The Ai Power diesel Reefer Generator Set is designed to provide highly reliable unattended continuous operation for all refrigerated ocean going container units in both over-the-road and rail transport modes.

How to choose a generator for a reefer container?

An undermount generator is especially suitable if you want to transport by frequently changing containers by truck. A generator of this type has a weight of around 700 kilograms. Clip on generators can be installed on the reefer container, therefore fitting more flexibly. Mounting and replacement can be done within minutes.

Are MPMC Reefer generators good?

MPMC Clip-on generator sets for Reefer Container are well designed with compact structures with high rates of efficiency and long lifespan for all refrigerated container units in over-the-road transportation, move with the reefer container. What Do You expect from mPMC reefer Gensets?
