# **EU solar Energy Storage**

## Overview

---

How many energy storage installations are there in Europe?

The total number is slightly higher than the 2024 figures released a couple of months ago by the European Association for Storage of Energy (EASE), which, in partnership with the consultancy LCP Delta tallied 21.1GWh of installations last year in its ninth annual European Market Monitor on Energy Storage (EMMES) report.

How does energy storage work in the EU?

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example on a sunny or windy day - and releasing it when more energy is needed.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Will Solarpower Europe deploy 780gwh of battery storage?

Despite this surge, SolarPower Europe said the continent is not on track to deploy the 780GWh of battery storage it claimed will be needed to ensure flexibility, reliability and decarbonisation of the energy sector in line with policy targets by 2030.

## EU solar Energy Storage

The total number is slightly higher than the 2024 figures released a couple of months ago by the European Association for Storage of Energy (EASE), which, in partnership with the consultancy LCP Delta tallied 21.1GWh of installations last year in its ninth annual European Market Monitor on Energy Storage (EMMES) report.

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example on a sunny or windy day - and releasing it when more energy is needed.

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Despite this surge, SolarPower Europe said the continent is not on track to deploy the 780GWh of battery storage it claimed will be needed to ensure flexibility, reliability and decarbonisation of the energy sector in line with policy targets by 2030.

The European Commission must adopt an Energy Storage Action Plan within a broader Flexibility Package, to harmonise markets, remove regulatory barriers, and ensure ...

During this session, the industry association SolarPower Europe presented an exclusive preview of the new European Market Outlook for Battery Storage 2025-2029, ...

The European Market Outlook for battery storage shows that growth comes from the rising demand for effective energy storage. This is key for using renewable energy

sources ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ensure grid flexibility, especially after the Iberian ...

New report: European battery storage grows 15% in 2024, EU energy storage action plan needed Press Release 7 May 2025 MUNICH, Germany (Wednesday 7th May ...

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

With the solar, energy storage and e-mobility industry sectors gathering at the Intersolar event in Munich, Germany, this week, European solar PV trade association ...

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ...

Speakers at the China-EU Solar & Energy Storage Industries Dialogue 2025 highlighted the growing interdependence between Chinese manufacturing scale and European ...

During this session, the industry association SolarPower Europe presented an exclusive preview of the new European Market ...
