# East Asia 30kva-ups uninterruptible power supply

## Overview

---

What is the growth rate of Southeast Asia uninterruptible power supply (UPS) market?

The Southeast Asia Uninterruptible Power Supply (UPS) Market is growing at a CAGR of greater than 3.3% over the next 5 years. Riello Elettronica SpA, EATON Corporation PLC, Emerson Electric Co., Delta Electronics Inc. and ABB Ltd are the major companies operating in this market.

What should I consider when buying a 30kVA ups?

One of the first things to consider when buying a 30kVA UPS is how much load it will run. These UPS can supply up to 30 kilo volt-amps of electrical power. This makes them perfect for medium-sized companies that have a lot of setting up. To select the right UPS, check how much power the machines, computers, and other equipment at work use.

How to install a 30 kVA ups?

The input of a 30 kVA UPS has to be connected to the main power line from a generator or utility source. An isolation switch should always be installed to provide additional safety at the UPS. The output terminals of the UPS need to be connected to the critical circuit that needs protection from power surges, sags, and interruptions.

What batteries are used in a 30kVA ups?

There are various batteries used in a 30kVA UPS, namely lithium-ion and lead-acid. While lithium-ion requires less maintenance and has a higher energy density, lead-acid requires frequent checks to avoid corrosion and discharge.
