

NKOSITHANDILEB SOLAR

East Timor Wind and Solar Energy Storage Power Station

INTEGRATED DESIGN

EASY TO TRANSPORT AND INSTALL,
FLEXIBLE DEPLOYMENT

Overview

What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP project.

Which power stations are in East Timor?

The following lists power stations in East Timor . The Hera power station was built to supply to the North coast of the country, while the Betano power station supplies electricity to the South coast and the Inur Sakato thermal power station provides electricity to the Oecusse District.

What is East Timor electrification masterplan 2025?

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies. The East Timor Renewable Energy Electrification Plan consists on the thorough analysis of wind, solar and hydro resources (including wind measurement stations installation).

Who bids for solar IPP project in Timor-Leste?

For Timor-Leste, bidders are typically from legacy countries such as Indonesia, Portugal and People's Republic of China. For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement.
