# Electricity cost after installing solar panels

## Overview

---

Do I still have an electric bill after installing solar panels?

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. However, the balance due on your monthly bills will be much lower - or even negative - because your solar production replaces and offsets the cost of buying grid electricity from your utility.

How much can solar panels save on my electric bill?

If your electric utility company charges you \$0.17 per kWh, you can save \$6.48 per day on your electric bill. This means that you can save \$194.40 per month on your electric bill with solar panels. In addition to the factors listed above, there are a number of other factors that can affect your monthly electric bill with solar panels, such as:

How much does a home with solar panels cost?

The average monthly electric bill for a home with solar panels is \$37.50. However, the amount of money you can save on your electric bill with solar panels will depend on a number of factors, such as the size of your solar panel system, the amount of sunlight your home receives, your energy usage habits, and the net metering policy in your area.

Will solar panels lower my electric bill?

You will possibly receive a lower electricity bill. Therefore, considering these factors, you can effectively lower your electric bill and you will notice the changes in electric bill before and after solar panels.
