# **Electrochemical Energy Storage ETF**

## Overview

---

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

What is the ESS ETF?

The ESS ETF is an European ETF that follows the performance of firms specializing in battery energy storage systems. The companies included are engaged in such categories as raw materials, manufacture, enabler, and emerging technologies. It is the second European ETF in this sector after BATT.

What is a Clean Tech ETF?

A Clean Tech ETF, such as the one mentioned in the Title, offers an opportunity to buy the stocks of companies engaged in advance material, smart grid, hybrid battery, and clean energy generation. The ETF's portfolio is composed of companies that manufacture, develop, distribute, or install these technologies.

What is the future of energy storage?

The global transition from conventional energy sources to green energy is driving the development of BESS (Battery Energy Storage Systems) technologies and related ETFs. The costs of energy storage are projected to reduce by 66-80 percent by 2030 and the global energy storage market is expected to grow up to 426bln USD.

## Electrochemical Energy Storage ETF

---
