Energy storage of Sydney New Energy Company Australia

Overview

How many GWh of energy storage does hyperstrong have?

This marks the first deal Hyperstrong, with over 20GWh of energy storage systems deployed globally, has signed since opening its new APAC headquarters in Sydney on Monday (21 October). The deal was signed on the first day of All-Energy Australia 2024 in Melbourne.

Should companies invest in energy storage?

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage.

Why did hyperstrong join all-energy Australia 2024?

The deal was signed on the first day of All-Energy Australia 2024 in Melbourne. The two companies will develop opportunities for modular BESS solutions for commercial and industrial (C&I) applications. Kevin Changbin Qiu, HyperStrong's CMO, said the partnership marks the company's symbolic entry into the Australian market.

How will Edify's Energy Storage System work?

Developed and structured by Edify, the energy storage system will utilise Tesla Megapacks, equipped with grid forming inverters that operate in 'Virtual Machine Mode'.
