**Exclamation mark appears on
the AC power of the outdoor
light charging power supply**

Overview

What does an exclamation mark mean?

The exclamation mark is a system notice, which means that the wattage of the power source is not enough. It leads the performance decreased, poor charging efficiency, and the battery level may decrease when you are still using the device along with charging it at the same time.

What does a battery charge indicator light mean?

Power/Charging Indicator: This light typically turns on when the charger is plugged into a power source, indicating that the device is receiving electricity and is ready to charge a battery. **Charging Indicator:** This light turns on when the charger is actively charging the battery. It may blink or remain solid, depending on the charging stage.

What do the lights on a battery charger mean?

Most battery chargers have one or more indicator lights that display the current status of the charging process. The specific meaning of these lights can vary depending on the charger model, but generally, they indicate the following:.

Why is my EV charger flashing a red light?

EV Charger Red Light – What's This and How to Quickly Fix?

EV chargers are equipped with diagnostic modules and they won't work when something is wrong with the electrical connection, voltage, network parameters, or whatever. The most common thing that you may see in this case is the flashing or illuminating red light on the EV charger.
