

# **Exemption of bifacial solar modules**

## Overview

---

Are bifacial solar modules exempt from Section 201 tariffs?

WASHINGTON, D.C. — In a win for the solar industry, the U.S. Court of International Trade (CIT) re-instated the exclusion of bifacial solar modules from the Section 201 tariffs. Originally granted in June 2019, the exclusion for bifacial modules was revoked by the Trump Administration in October 2020.

Are bifacial solar panels exempt from Section 201 duties?

President Biden issued Proclamation 10779 on June 26, 2021, removing the exemption from Section 201 duties on solar cells for 'bifacial solar panels' that are imported on or after June 26, at 12:01 a.m. EDT due to surges in imports in recent years. Since no longer exempt, bifacial solar cells would be subject to Sec 201.

Will bifacial solar panels lose exemption?

In addition to bifacial panels losing their exemption, the Biden Administration said it will raise the tariff-rate quota (TRQ) of silicon solar cells by 7.5 GW, if needed.

What is a bifacial solar tariff?

This measure aims to support the announced 125 GW of solar module assembly manufacturing capacity without stifling emerging solar cell production. Bifacial solar panels, which are predominantly used in commercial, industrial, and utility-scale solar power projects, were previously exempt from tariffs.
