Expanding solar panels

Overview

Can I expand my solar system?

If your solar system isn't quite meeting your electricity needs, it's almost always possible to expand your system to incorporate more panels. Adding panels to an existing system is more common than you might expect. We'll discuss why expanding your array is a great option, and we'll address the best ways to do so.

Should I upgrade or expand my solar panel system?

Upgrading and expanding your existing solar panel system could be your answer. When it comes to solar energy, maximizing efficiency and optimizing performance are crucial.

How do I add solar panels to my existing system?

If you want to add solar panels to your existing system, the first step is to contact your original installer or another certified PV professional. During your consultation, you can determine which upgrades will be necessary to accommodate the new panels. Is it worth adding more solar panels?

.

Is our solar system expanding?

In other words, our solar system – our sun, our Earth and its family of nine planets – is not expanding. Earth is located 150 million kilometers – about 93 million miles – or 8 light-minutes from the sun. It's thought to have been located at this distance from the sun since our solar system was born, some four-and-a-half billion years ago.
