## Overview

---

How would a multilateral electricity market work in Tajikistan?

Multilateral electricity markets would provide several options for Tajikistan to increase revenue. In addition to the current practice of seasonal surplus electricity sales through bilateral arrangements, daily or weekly surpluses could also be sold in day-ahead or week-ahead markets.

What is electricity trading in Tajikistan?

Most electricity trading arrangements in Tajikistan today are long-term bilateral contracts with limited options for variations in volumes or price.

Should Tajikistan increase its institutional readiness for more integrated electricity markets?

Tajikistan should increase its institutional readiness for more integrated electricity markets. Effective cross-border trade depends on a reliable power sector at the domestic level.

Should Tajik use hydropower for economic gain?

For Tajikistan, given its economy and the financial and physical condition of its power sector, regional electricity market opportunities would be attractive. Multilateral trade would allow the use of Tajik's excess seasonal hydropower for economic gain in the near term.
