# Foreign trade battery pack factory

## Overview

---

The Megafactory is the first of its kind built by Tesla outside the United States and is dedicated to manufacturing Megapacks, Tesla's energy-storage batteries. Is Tesla launching a battery factory in Shanghai?

Tesla's new battery factory in Shanghai. Photo: Xinhua In this week's Caixin energy wrap, we analyze China's biggest climate and energy news on policy, industry, projects and more: • China to restrict export of battery tech • Tesla opens Shanghai battery plant • NEVs' auto market share to top 55% • Envision beats rivals in wind power bids.

Did Tesla export its first batch of energy-storage batteries to Australia?

SHANGHAI, March 21 (Xinhua) -- Tesla's new Megafactory in east China's Shanghai on Friday exported its first batch of Megapack energy-storage batteries, the company announced. It took the new Megafactory just over a month after its production launch to achieve its first export, with the batteries being transported from Shanghai Port to Australia.

Will China restrict the export of lithium-ion batteries?

- Envision beats rivals in wind power bids In focus: China mulls export restriction on battery technologies What's new: China is considering restricting the export of some technologies used in the production of lithium-ion batteries, the core power source for electric vehicles (EVs) and critical for the global clean energy transition.

Why did Tesla export a battery?

This export highlights Tesla's further expansion in the global energy storage market, and also underlines the extension of its battery technology from electric vehicles to energy storage, according to the company. "Megafactory gives us the ability to scale production and efficiency," said Mike Snyder, vice president of Tesla.
