Foreign trade solar panels

Overview

Does trade friction affect solar photovoltaic trade?

As a key renewable energy, solar photovoltaic (PV) trade also suffers from large-scale trade frictions. China, as the largest solar PV manufacturer and exporter, accounts for 80 % of the global supply chain. Under this background, this paper takes China as a case, to assess the impacts of trade frictions on PV trades.

Which countries are involved in a solar trade dispute?

Argentina is the largest initiator in these events, with seven events involving three types of interventions. The EU27 amended non-preferential rules of origin on solar panels in 2013, which is an essential aspect of the China-EU PV trade dispute.

Are tariffs affecting the global solar trade?

The threat of tariffs on countries that supplied more than \$10 billion of solar products to the United States last year, accounting for the vast majority of domestic supplies, has caused a dramatic shift in the global solar trade.

How will China's tariffs affect the solar industry?

In order for the tariffs to be finalized, the International Trade Commission must vote in June on whether the industry was materially harmed by the dumped and subsidized imports. The tariffs target major Chinese firms like Jinko Solar and Trina Solar, and go as high as 3,500%.
