# **Generator Charging Station**

## Overview

---

How to charge a portable power station using a generator?

Here is how to charge your portable power station using a generator: **Connect to Generator:** Use the charging cable to connect the power station's AC input to the generator's AC output. **Start Generator:** Power on the generator to start charging. Make sure it operates in a well-ventilated area to avoid the buildup of exhaust fumes.

Should I charge my battery power charger station with a generator?

Charging your battery power charger station with a generator is an excellent option for those who need a quick and robust power source when other methods are not feasible, such as during extended power outages or in remote locations without access to electrical grids.

How do I charge a power station?

See more **EFFICIENT CHARGING:** Use the adapter included in the package to charge the power station from 0 to 80% in 2hrs, and use the this power supply to charge other devices at the same time while charging, which could be equivalent to a charging strip , improving the efficiency of uses.

Can You charge a portable power station while using it?

Yes, you can charge a portable power station while using it, a process known as pass-through charging. This feature allows you to simultaneously power devices and recharge the station, making it highly convenient for continuous use, although it may impact the charging efficiency and overall battery lifespan.
