# **Georgia EK Energy Storage Electricity Cost**

## Overview

---

How much does electricity cost in Georgia?

That adds up to \$3,024 per year. That's 9% higher than the national average electric bill of \$2,767. The average electric rates in Georgia cost 15 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in Georgia is using 1,656.00 kWh of electricity per month, and 19872 kWh over the course of the year.

How much does solar cost in Georgia?

On the EnergySage Marketplace, solar shoppers in Georgia pay an average of \$36,000 for a 13.7 kW solar panel system prior to incentives. The savings from offsetting 100% of an electric bill with solar can add up fast!

What is a monthly electric bill in Georgia?

Monthly electric bills are a product of how much electricity you use per month and your electric rate. In Georgia, the average monthly electric bill for residential customers is \$252/month, which is calculated by multiplying the average monthly consumption by the average electric rate:  $1,656.00 \text{ kWh} * 15 \text{ ¢/kWh}$ .

How many kilowatt (kW) solar panels do you need in Georgia?

Based on the intensity and amount of sunlight hours in Georgia, the average electricity customer in Georgia will need a 13.7 kilowatt (kW) solar panel system to offset 100% of their annual electricity consumption of 19872 kWh per year.
