Georgia high power solar panels

Overview

What are the largest solar installations in Georgia?

One of the largest solar installations in Georgia is Butler Solar Project 103. As the average cost of solar drops and more large solar projects come online, more and more Georgia residents will be able to use clean, renewable energy in their homes, even without installing rooftop solar. The passage does not provide a complete list, but mentions one notable installation.

Is Georgia a good place to install solar panels?

Georgia is a good place for solar installations, with 217 sunny days a year and high power bills. The dropping prices of solar panels and decreasing installation costs and time have led to an increase in the number of Georgians opting for residential solar installations. The solar industry in Georgia is growing.

How many solar farms are in Georgia?

As of December 2025, there were 152 utility-scale solar farms in Georgia. Their total operating capacity is 5,414 megawatts (MW). How many solar farms were built last year in Georgia?

In 2024, there were 8 solar farms built in Georgia. What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025.

What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025. The project is located in Jefferson, GA and has a capacity of 260 MW. Cleanview tracks 10,000+ power projects, 1,000+ data centers, and 700+ developers in the U.S. Each month we spend hundreds of hours researching and updating our database.
