# Germany s new battery storage

## Overview

---

How many battery storage systems are there in Germany?

According to preliminary numbers from the German Solar Industry Association (BSW Solar), there were 1.8 billion installed battery storage systems in Germany at the end of last year. They had a capacity 19 gigawatt hours (GWh), enough to cover the daily electricity consumption of two million two-person households.

How many battery storage systems were installed in Germany in 2024?

Almost 600,000 new stationary battery storage systems were installed across Germany in 2024, increasing the country's storage capacity by 50 percent year-on-year, according to preliminary data from the German Solar Industry Association (BSW Solar).

Why does Germany need a battery storage system?

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage systems in Germany grew by approximately 50 percent compared to the previous year.

Where is Germany's largest battery storage system located?

In March 2025, Germany's largest battery storage system - located in Bollingstedt, Schleswig-Holstein - was connected to the grid. It delivers 103.5 megawatts of power and has an energy capacity of 238 megawatt-hours. The expansion of electricity storage is a key component of Germany's energy transition.

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage systems in Germany grew by approximately 50 percent compared to the previous year.

In March 2025, Germany's largest battery storage system - located in Bollingstedt, Schleswig-Holstein - was connected to the grid. It delivers 103.5 megawatts of power and has an energy capacity of 238 megawatt-hours. The expansion of electricity storage is a key component of Germany's energy transition.

Additionally, 323 large battery storage systems contribute approximately 2.35 GW of power and nearly 2.9 GWh of storage capacity. During the first six months of 2025, over ...

Germany installed nearly 600,000 new stationary battery storage systems in 2024, increasing storage capacity by 50%. According ...

Storage systems for different needs Battery storage systems in Germany serve a variety of purposes depending on their scale. Home storage systems are primarily used to ...

German battery storage hits 22.1 GWh in H1 Germany's battery storage capacity is rapidly expanding, nearing 2 million ...

Almost 600,000 new stationary battery storage units were installed last year. That amounted to an annual increase of just under 50 ...

What thousands of new project applications reveal about Germany's grid and market momentum. The 2024 grid-connection figures provide one of the clearest snapshots of ...

German battery storage hits 22.1 GWh in H1 Germany's battery storage capacity is rapidly expanding, nearing 2 million installations by the end of the first half of 2025.

Germany has surpassed a major clean energy milestone, with more than 2 million battery storage systems now installed nationwide, according to new data from the Federal ...

Almost 600,000 new stationary battery storage units were installed last year. That amounted to an annual increase of just under 50 percent. There were 15.4 GWh of capacity ...

Almost 600,000 new stationary battery storage systems were installed across Germany in 2024, increasing the country's storage ...

Storage systems for different needs Battery storage systems in Germany serve a variety of purposes depending on their scale. Home ...

Battery storage systems in Germany surpassed 2 million by the end of July 2025, offering a total capacity of about 14,000 MW/ 22.5 GWh, according to German research ...

A successful energy transition will require a variety of storage systems to absorb electricity during peak times and release it when needed -- for example in the evening and at ...

Almost 600,000 new stationary battery storage systems were installed across Germany in 2024, increasing the country's storage capacity by 50 percent year-on-year, ...

Germany installed nearly 600,000 new stationary battery storage systems in 2024, increasing storage capacity by 50%. According to the German Solar Industry Association ...

Battery storage systems in Germany surpassed 2 million by the end of July 2025, offering a total capacity of about 14,000 MW/ 22.5 ...
