Government emergency communication command base station

Overview

What is a SATCOM base station?

This system is a powerful, global, cost-effective solution that provides assured communications to military, special forces, law enforcement and government agencies. The self-contained SATCOM Base Station is housed in a rugged carrying case, and includes a laptop computer, Base Station Radio, antenna, and cabling.

What is the national emergency communications plan (necp)?

The National Emergency Communications Plan (NECP) is the nation's strategic plan to strengthen and enhance emergency communications capabilities.

Why should emergency response systems be able to share information securely?

Enable the nation's emergency response community to communicate and share information securely across communications technologies in real time, including all levels of government, jurisdictions, disciplines, organizations, and citizens impacted by any threats or hazardous events.

Where can I get training for Combat Search & Rescue radio products?

We currently offer operation and maintenance training for Combat Search and Rescue radio products at our Scottsdale facility, which is conveniently located seven miles from Phoenix Sky Harbor International Airport. If you'd prefer for us to come to you, Customer Onsite Training is also available: please contact us for a quote.
