Greek electric energy storage equipment

Overview

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

How many MW of storage will Greece need by 2030?

The majority of the projects (2,650 MW) belong to Group Γ and will connect to ADMIE as follows per region. A key factor driving companies is that this large capacity will cover all the storage needs Greece will require by 2030.

Is a 'fever' gripping the new energy storage sector?

An investment 'fever' is gripping the new energy storage sector as the ministerial decision was published yesterday (Ma), setting the rules for installations with a total capacity of 4.7 GW in our country. So far, three auctions have supported 900 MW projects with subsidies.

How many MW of battery storage will be installed on the ADMIE grid?

These will be supplemented by the 4.7 GW from the ministerial decision, which pertains to commercial battery storage units operating in the market without subsidies. According to the decision by the Ministry of Environment and Energy, 3,800 MW will be implemented on the ADMIE grid plus another 900 MW on the DEDDIE distribution network.
