High Energy Portable Power Supply

APPLICATION SCENARIOS

Overview

Editor's Note: We updated our Portable Power Stations guide on J, to add the EcoFlow River 3 Plus, our new best budget choice; the Anker C300 DC, our choice for best backpack power station; the workhorse Bluetti Elite 200 V2; Bluetti's pro-photographer-centric Handsfree 2 Backpack, and the extra-portable Bouge RV JuiceGo. Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

What accessories do you need for a portable power station?

One of the most common accessories is going to be a cord to connect to similar power stations in series, often times doubling your power output. Some portable power stations have a light bar built into the housing, which is useful for seeing at night. Anker's Solix C300 also includes a pop-up camping light.

What is the best portable power station?

By far the most portable power station in our guide, the EcoFlow River 2 Pro weighs just 17 pounds and has a large handle along the back. The LiFePO4 battery inside is good for 768 watt-hours, and I managed to squeeze a little more out of it in my tests. The ports are great for camping trips, with everything you need to charge small gadgets.

How much power does a portable power station need?

For basic emergency use (lights, phone charging, small medical devices), a 300Wh to 500Wh station is sufficient. To run larger appliances like a fridge or microwave, go for 1000Wh or more. Can I use a portable power station while it's charging?

Yes.

High Energy Portable Power Supply
